The Windua Y1000 is a 1 kW horizontal axis wind turbine designed to generate electricity efficiently for residential use and small-scale energy projects. Its composite blades, low noise level of 33 dB, and

All turbines are designed & manufactured in the United Kingdom within a continuous product improvement policy. The AirForce™ 1 turbine is supplied in kit form and tower-top ready for simple

The EN-1KW-L use the reinforced fiberglass blades with optimized aerodynamic structural design, it help the turbine increase the working efficiency and wind energy utilization.

People exploring a reliable 1 kW wind generator for home use or off-grid living can choose from compact horizontal and vertical designs, hybrid systems, and portable options. This

Featuring a horizontal-axis design and an intelligent speed-regulation system, it operates effectively in a wide wind speed range of 3-25 m/s and can achieve stable performance in areas with an average

Suitable for both domestic and industrial use, for storage (Stand Alone System) and electric bill reduction (Grid Connected System). Can be easily installed without needing any permission from local or

Harness the power of wind with the 1KW 2KW 3KW horizontal axis wind turbine! High efficiency, durable design, perfect for your energy needs.

With more than 6,000 units already in service worldwide, the highly robust and dependable H1 micro wind turbine demonstrates enviable capability in energy generation in an extensive range of

1kW horizontal outdoor wind power generation system

A 1kW horizontal axis turbine might not sound like much, but if you consider that wind often blows at a constant speed for long periods of time, it becomes possible for the turbine to generate 8 to 10kWh

Aeolos-H 1kW wind turbine is a simple, easy installation and reliable wind generator with tail. The first installation was made in 1986 in Denmark as the off grid application for home power supply.
