We offer two types of solar containers that differ in design and power output. Besides our flagship, auto-foldable container, we also offer the manual version of this unit.

The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly aluminum rail system,

Introduce power to any location with our Solar Energy Container. It's a transportable, fast-to-deploy source of green energy, housed in a standard-sized container for global mobility. Set on hydraulic

A versatile mobile solar PV container offering plug-and-play green energy solutions with modular design, high-efficiency panels, and global mobility for off-grid and emergency power needs.

Solarfold allows you to generate electricity where it's needed, and where it pays to do so. The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of

We are actively driving the evolution towards emission and noise compliant power solutions at worksites. The mobile solar container range redefines on-site power by harnessing the sun's energy in an

This comparison highlights why industries are shifting from diesel-based systems to solar containers, especially in areas where fuel supply is costly or logistically difficult.

This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations.

# Mainstream solar container outdoor power cells

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no

A mobile solar container is a self-contained, transportable solar power unit built inside a standard shipping container. It includes solar panels, inverters, batteries, and all wiring components in one
