We are your all-in-one resource for solar and photovoltaic expertise, from design, planning and yield assessments to commissioning, operations and maintenance. Find out more!

A Request for Proposal (RFP) is a critical document when procuring a Battery Energy Storage System (BESS). It defines technical specifications, project requirements, and

The purpose of this checklist is to serve as a comprehensive guide for procurement directors, supply chain managers, and renewable energy project managers. It outlines the critical steps and

To complete and underpin such robust growth, the EU policies and national legislations related to the electricity market must introduce new instruments, taking into account new

The legislation on photovoltaic projects in Spain is rigorous, and understanding the photovoltaic regulations is essential to carry out any project of this type successfully and in accordance with the law.

PV Modules Under the ElektroG4 ? Key Questions and Answers for Manufacturers and Dealers
With the ElektroG4, which took effect on January 1, 2026, new and stricter obligations apply to manufacturers

The reference flow is the amount of product needed to fulfil the defined function and shall be measured in m² of photovoltaic module per kWh of the total energy required by the application over its service life.

Further overarching certification systems: Other standards cover various minerals and parts of the supply chain (for example, the Responsible Minerals Initiative's ESG Standard for Mineral Supply

Requirements for suppliers of photovoltaic and energy storage

Checklist provides federal agencies with a standard set of tasks, questions, and reference points to assist in the early stages of battery energy storage systems (BESS) project

It involves supplier selection and onboarding, and conducting inspections, and tests to qualify materials to be used in construction throughout the procurement process.
